

YASH TUPKAR

Software Engineer

+91-7898297769 yashtupkar6@gmail.com LinkedIn GitHub Portfolio Bhopal, MP

Profile

Full-stack Software Engineer with production experience building AI-powered SaaS applications using the MERN stack. Experienced in developing scalable web applications, REST APIs, real-time systems, cloud deployments, and secure authentication. Passionate about building reliable software that solves real-world problems.

Work Experience

Founding Software Engineer Intern

Devplex Technologies Pvt. Ltd.

Jul 2025 – Mar 2026

Bengaluru, Karnataka

- Engineered and launched Devplex AI, a SaaS platform serving 100+ active users, taking ownership from architecture to production deployment.
- Designed and developed scalable frontend and backend systems using React.js, Node.js, Express.js, and MongoDB, delivering responsive user experiences and production-ready REST APIs.
- Integrated LLM APIs to power AI-driven website generation, enabling the platform's core product functionality.
- Optimized application performance through lazy loading, efficient API design, and database query improvements, reducing page load times and improving responsiveness.
- Deployed and maintained production infrastructure on AWS while collaborating with founders and engineers in an agile development environment.

Projects

EVSynC — EV Charging Ecosystem MERN, JWT, Razorpay, Leaflet, OSRM, ESP32 IoT [Code] [Live] May 2026

- Built real-time charger socket telemetry using ESP32, ACS712, ZMPT101B, 1-channel relay, and SSD1306 OLED display — the hardware feeds live current data to the web dashboard
- Developed full-stack EV station discovery and route planning with interactive Leaflet maps and OSRM navigation
- Designed Express/MongoDB backend with station and user APIs, admin controls, and booking-ready architecture
- Integrated Razorpay payments and JWT-based authentication for secure multi-role access

PlaceMateAI — AI Placement Prep Platform MERN, Razorpay, OpenRouter, Azure TTS [Code] [Live] April 2026

- Built a full-stack AI interview prep platform covering mock interviews, group discussions, and coding rounds with real-time voice interaction
- Designed a voice AI pipeline using Web Speech API (STT) + OpenRouter (Gemini) + Azure TTS for end-to-end voice-based interview sessions
- Implemented ATS resume analyzer and Resume Builder with detailed performance analytics dashboard
- Built subscription system with credit-based usage, Razorpay payments, and secure authentication.

Technical Skills

Languages: JavaScript, TypeScript, C, C++

Backend: Node.js, Express.js, REST APIs, Redis, JWT Auth, Socket.io, WebRTC

Cloud & DevOps: AWS, Git, GitHub, CI/CD, Linux

Frontend: React.js, Next.js, Redux, Tailwind CSS, HTML5, CSS3

Database: MongoDB, PostgreSQL, SQL

Tools & APIs: Razorpay, Clerk, Postman, GenAI

Education

Sagar Institute of Science Technology and Research, Bhopal

B.Tech in Computer Science and Engineering — CGPA: 7.85/10

2022 – 2026

Bhopal, MP

Govt. Excellence Higher Secondary School Sausar

Class XII — 68.8%

2021 – 2022

Sausar, MP

Achievements & Recognition

- Winner** — SISTec Innovation Hackathon 2025 — built and pitched a live AI product to a panel of industry judges
- Winner** — National Science Day Project Expo, SISTec-R — AI-powered patient diagnostic software recognized for innovation
